Maylo Elfrink

Software Developer and CMGT student at Saxion University of Applied Sciences, specialising in game development. My main focus is programming, with experience in Unity and C#, developing gameplay systems, mechanics, tools, and solving technical challenges.

Alongside programming, I have a supporting focus in 3D art and environment creation, using tools such as Maya and Substance. I enjoy combining technical and creative skills to turn ideas into engaging interactive experiences.

My goal is to continue developing as a game developer and contribute to projects that are both technically strong and creatively engaging.

- C#
- HTML/CSS
- JavaScript
- Shader (HLSL)
- PHP
- Java

- Maya
- Substance 3D
- Zbrush
- Photoshop
- Unity
- Git
